

December 6, 2021 Why it matters: Software piracy isn't new, but with the proliferation of "activators" for Windows and Office, you've got attackers too. The problem is that when you buy an "activator", you are not buying it from Microsoft. "Accelerators" work with hacking tools or malware and are used to obtain an activation code or obtain a Windows or Office key. They can also use malware or hacking tools to obtain activation keys such as Office 365, Windows Server, SharePoint, and Exchange and then use those keys to distribute that malware to you.
